We are one of the major manufacturers of plant based speciality products and ingredient solutions in India for food, animal nutrition and other industrial applications, with an installed capacity of 1,100 metric tons per day. Through complex, multi-step value addition and manufacturing process, we turn maize into ingredients and solutions that add taste, texture, nutrients and increased functionality to (i) foods as ingredients, thickening agents, stabilizers, sweeteners, emulsifiers and additives in food products (bakery products, confectionery, pastas, soups, ketchups, sauces, creams, deserts, amongst others), (ii) animal nutrition products as nutritional ingredients, and (iii) other industrial products as disintegrants, excipients, supplements, coating agents, binders, smoothing & flattering agents, finishing agents, among others.

We are the third largest manufacturer of maize based speciality products and ingredient solutions in India. Our products include liquid glucose, dried glucose solids, maltodextrin powder, dextrose monohydrate, native starches, modified starches and co-products like germs, gluten, fiber and enriched protein, amongst others. Our speciality products and ingredient solutions are produced at our large-volume, state of the art, strategically located manufacturing facilities at Dhule in Maharashtra and Kutch in Gujarat. We believe that our leading position in the industry, technical knowledge to bring specific functionality and nutrition to end products, more than five decades of experience, state of the art manufacturing facilities, diverse product portfolio and clientele in domestic and global markets, provide us with competitive advantage.
